

Notice of CPU Boards Changes (For Use in the Traversing Inverter of 400V class and TIB)

Thank you for selecting a Mitsubishi hoist and related products. This letter is to notify the CPU boards changes (for use in Traversing Inverter of 400V class and TIB).

1. Changes

CPU boards for traversing

2. Subject Models

- ①Products: 400V class All models of U2, UR, US with traversing inverter.
400V class TIB (for voltage type brakes and current type brakes)
- ②Parts: CPU boards for traversing of 400V class, CPU boards for TIB of 400V class.

3. Schedule for Changes

- ①Products: The acceptance of order in May 2016, or after.
 - ②Parts: The acceptance of order in May 2016, or after.
- Please order the product with new part code.

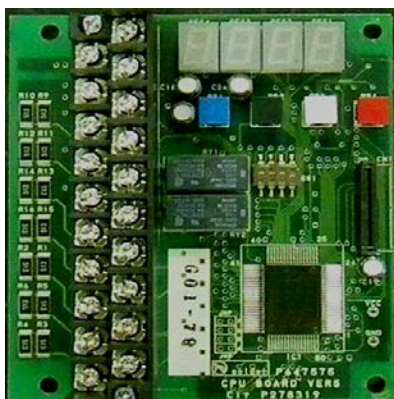

CPU board	Existing Product		Switching Product	
	Part Code	Drawing. No	Part Code	Drawing. No
	03G54L	P647575G05	03G572	PA01133G01

4. Reason for Changes

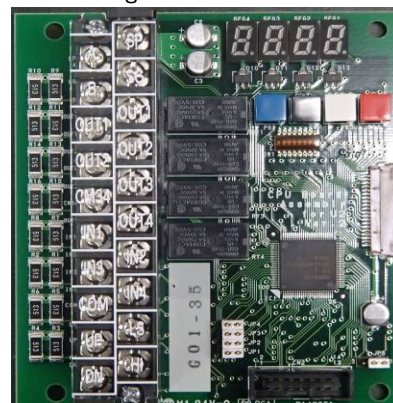

For the improvement of performance and quality.

5. Changes & Cautions

- (1) The function of error detection output and operation status output are equipped as standard.
- (2) **【New function】** The synchronism operation function (when using two hoists at together) is included as safety function.
- (3) It is possible that to set the frequency per 0.1Hz when the frequency is 10Hz and under.
- (4) The improved sinusoidal modulus makes low noise.
- (5) Switching product is compatible with existing product.
- (6) **Ensure that a wire is rewired, and set the function selector switch when replacing a board.**
- (7) Refer to the Instruction Manual about details and setting of additional functions.

【Existing Product】P647575G05

【Switching Product】PA01133G01
