

Notice of CPU Boards Changes

(For Use in the Hoisting Inverter of 400V/200V class U series)

Thank you for selecting a Mitsubishi hoist and related products. This letter is to notify the CPU boards changes (for use in hoisting Inverter of 400V/200V class U series).

1. Changes

CPU boards for service parts

2. Subject Models

①Parts : for use in hoisting Inverter of 400V/200V class U series

3. 3. Schedule for Changes

①Parts : The acceptance of order in May 2016, or after.

Please order the product with new part code.

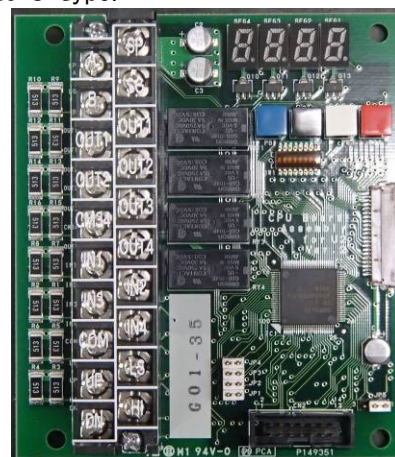

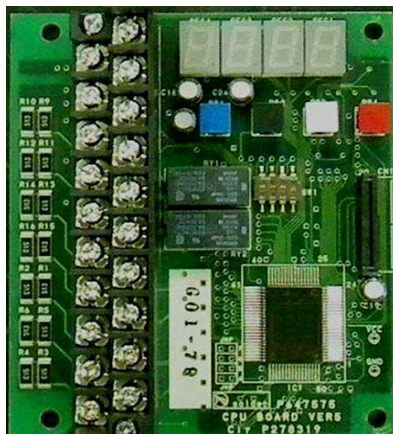

CPU board	Source voltage	Existing Product		Switching Product		Remarks
		Part Code	Drawing. No	Part code	Drawing. No	
	200V class	03G540	P145619G01	03G547	PA01139G01	All models
	400V class	03G54K	P147425G01	03G571	PA01140G01	5 t and under

4. Reason for Changes

For the improvement of performance and quality.

5. Changes & Cautions

- (1) The function of error detection output and operation status output are equipped as standard.
- (2) It is possible to inspect the number of starting times and the operation time at fault occurrence.
- (3) It is possible that to set the frequency per 0.1Hz when the frequency is 10Hz and under.
- (4) The improved sinusoidal modulus makes low noise.
- (5) Switched product is compatible with existing product.
- (6) **Ensure that a wire is rewired, and set the function selector switch when replacing a board.**
- (7) Refer to the Instruction Manual about details and setting of additional functions.
- (8) Combined hoisting operation is impossible due to U type.

【Existing Product】P145619G01/P147425G01

【Switching Product】PA01139G01/ PA01140G01
