

Notice for change in the serial number system

We highly appreciate for your continuous sales support on Mitsubishi Hoist and related items. This time, we would like to make an announcement of change in the serial number system.

1. Changed contents
The serial number system is changed to improve history management.
2. Subject models
All products including OEM Saddle
3. Subject models・Changed contents・Schedule for change

①Standard item

Work No. body				Item	Year	Serial Number		Year		Month	Work No. body				Item	Serial Number	

Supplementary explanation)

- ・Although the usage of alphabet for the Standard item was used to use to identify the Standard item, it becomes easier to identify Standard item by engraving 「H」 in the last four digits after change. (The number of digits is also different)
- ・In the case of the modification and overhaul after shipment from factory, the product's nameplate is replaced as in the past. 「K」・「R」・「H」・「S」 etc. are engraved at the beginning of the Work No. body in the product's nameplate
- ・Please note that in the case of the OEM saddle, the indication location of manufacturing date is different from other items due to the system.
- ・The manufacturing date that is used for serial number is determined when the order is issued. And the manufacturing date that is used for serial number is not changed even if the actual shipment month is changed. Therefore, in order to know the actual manufacturing date, please check the manufacturing date section on the product's nameplate as in the past.
