

Notice for supply of service parts for old hoist models

We highly appreciate for your continuous sales support on Mitsubishi Hoist and related items.
For hoists and related equipment, we have been supplying consumable parts for hoists and related equipment that have been discontinued for about 30 years.

Therefore, we would like to inform you of the supply deadline for service parts for the following models.
We ask that you consider replacing to the current model.

1. Subject models 〈Models added this time〉

(1)J-1/4t (2)HL-1A-M2

(3)E type (Single-phase)、UE type

※Only dedicated parts will be discontinued, but E-type (three-phase) and common parts will continue to be supplied.

(4)S-2.8-O type (5)S-2.8-VTO type (6)S-1-HFO type 【Revision A】

2. Supply deadline

We will discontinue production of all service parts after receiving orders in March 2024.

(Shipping will also be until the end of September 2024.)

Please note that some parts may be discontinued before the above deadline.

3. Requests

(1) The above products have already exceeded their design life, and we recommend replacing them.

Please update to the current model as soon as possible.

(2) The number of service parts that cannot be supplied for the above models has already increased, and there are cases where quotations are declined. (Example: mold parts, etc.) Please ask for a quotation each time.

(3) Service parts supply period for hoists and related equipment (saddles, etc.) is 11 years after the end of production.

Although considering the frequency of use, we are trying to supply as long as possible, there are service parts that we can not continue to supply due to parts with few orders and deterioration of molds.

Please inquire each time about equipment that has passed 11 years since the product was discontinued.

(4) Among the models for which service parts have been discontinued, some parts are shared with current models.

The models for which the supply period has expired are not covered by the repair warranty.
